You should be able to see this in your mind's eye, even without your guitar in your hands. This is attainable with very little effort. Only a little regular practice at visualizing this and you will have it down second nature!

Don't forget to practice improvising using these shapes/sounds. This is the real meat-and-potatoes. Explore various patterns within this big pattern to become familiar with all areas of the fretboard.

Again, let me know if you have problems, questions, comments or suggestions!
